

## Opportunity for a Full-stack Software Engineer, Web Developer (Python & JavaScript)

Join the dynamic and multicultural team behind one of the largest top-level domains in the world, .eu (also available as .euo and .eu).

Our human-sized, tech-oriented, not-for-profit organization is dedicated to managing, operating and promoting the .eu TLD with a mission to provide high-quality, secure, and accessible services to millions of users across the EU and beyond. Operating .eu, since its creation in 2003, EURid has built a very strong technical expertise in the top-level domain industry.

We are, seeking a full stack web developer (Python / JavaScript) to strengthen the development teams in our Belgium (Diegem) office. As software engineer working in EURid you will contribute to the architecture and evolution of our web platforms and services, support modern public-facing services, a headless CMS ecosystem, improved monitoring platforms, and deeper integration with mission-critical back-office systems.

You will take leadership in key technical decisions related to web applications and integrations and help shape the digital interface of Europe's Internet space.

### Key responsibilities:

- Lead technical design and architectural decisions for web applications
- Develop integration layers and proxy components connecting front ends with backend services
- Contribute to the development and maintenance of our content management system
- Implement high-quality web front ends and user interface screens
- Build and improve web-based monitoring dashboards
- Conduct code reviews, promote test driven development, high engineering standards and mentor team members
- Participate in agile ceremonies and collaborate with product owners, business analysts and the service delivery manager to refine requirements
- Work with DevOps and Security teams to apply best practices and comply with OWASP, NIS2 and GDPR

### Qualifications:

#### *Education & experience:*

- Degree in computer science, information technology, engineering, or a related field, or equivalent experience
- 5+ years of relevant work experience as a full stack web developer
- Experience delivering features in agile environments

#### **EURid vzw**

Telecomlaan 9, B-1831 Diegem (Belgium)

RPR Brussel • VAT BE 0864.240.405

### Technical proficiencies:

- In-depth knowledge of HTML, JavaScript and CSS
- Very good knowledge of Python, with Django or similar frameworks
- Good knowledge of React, Next.js or similar modern web frameworks
- Testing mindset with solid experience in unit, integration, and interface testing
- Knowledge of containerization tools like Docker
- Knowledge in relational databases, especially PostgreSQL, and ORM tools
- Familiarity with CI/CD pipelines, Git workflows, and tools such as Bamboo, Jenkins, GitLab CI
- Experience with system modelling practices, such as UML, ArchiMate, or equivalent standards to support architectural design and documentation
- Experience with the Atlassian tool stack, especially Jira for backlog management and Confluence for technical and project documentation

### Soft Skills:

- Excellent communication and collaboration skills
- Customer-centric and service-oriented mindset
- Strategic thinker with strong problem-solving and analytical abilities
- Able to take ownership of technical decisions and provide guidance to peers on best practices
- Fluent in English (spoken and written), other European languages are an asset

### What we offer:

- A dynamic and international work environment
- A competitive compensation package that includes a competitive salary, a company car, meal vouchers, a comprehensive group and health insurance plan and additional holidays
- Healthy work-life balance including hybrid work
- Opportunities for growth and development
- A role that supports a high-impact, high-visibility European digital initiative

You will join a highly skilled, mission-driven team working on projects that matter for Europe's digital future. So don't miss this exciting opportunity to take your backend engineering career to the next level and help build the future of the Internet in Europe.
